

### **Sample Script for Voices Simulation**

There are 4 different types of voices that are simulated on the CD. There is a kind female voice, a male voice, an angry female voice and chorus voices. The CD begins with a song. Slowly the voices break in take over the listeners experience. There are also periods of silence during the simulation.

Female Voice: This is a very intense voice. It is loud and shouting but also soft and shouting. Hoarse. Always insistent. Always on edge and urgent. Always on guard; warning; belittling; scanning; telling you what to do; at times menacing.

Sample: "Don't look up! Don't! I said don't. Don't. Don't look up. Don't. Eyes down. Listen! I said to listen Listen listen listen listen. Eyes down. Down. Don't look up. Shut up. Down. Shut up. Just shut up. Do not touch that. Don't. Do not do it. Don't. Do not touch that. Stop. Eyes down. Don't think. Think don't. Just watch. Not now. Stop. Just stop for once. On the left wall. Do you see it? You suck. I said eyes down. You suck you know that! Eyes down. What are you looking at? What? What are you looking at? You are filthy minded. Filthy minded. Filthy. Eyes down. Are you looking? Are you looking? (laughing) Are you looking? Why don't you go write it on the wall. Write the damn shit all over your face. Why don't you tell all of them? Why don't you wear it like flag. Like a rag. Light it up. Look down. Eyes down. Hut. Hut. Hut."

Male Voice: This male voice is positioned close to the ear. It sounds very close. It is a quiet but disturbing male voice. This voice breaks in for short periods of time and then goes away.

Sample: "Look at you. You're a mess. You are always a mess. Can you see your mess? Everyone else can. When are you going to get it right? When will you finally get it right? It's easy. Why can't you get it right? Everyone else can do it right. You, you always mess it up. You screw it up. Never right. You are never right. You never do it right. Why don't you clean up your mess? Just clean it up for once, okay."

Chorus voices: These are voices that whisper and giggle. They almost say something, but not quite. They are fairly constant throughout the tape. They are both male and female.

Nice female voice: She speaks very softly. She seems almost mystical and is beckoning the listener to come to a safe place. She only appears for short periods of time.

Sample: "You are okay. Come. Come to the harbor. Trees are safe. Come. We'll take good care of you. Come safe trees. To the harbor."
